WORK EXPERIENCE

Build 4 All SARL

Full-Stack Software Engineering Intern

February 2026 - April 2026

Collaborated within an 11-member Agile team to develop an end-to-end software solution, designing and implementing Java/Spring Boot RESTful APIs and cross-platform mobile applications using Flutter and Dart. Contributed to the full software development lifecycle, including requirements analysis, development, testing, debugging, and code reviews. Participated in Agile ceremonies and collaborated with team members to deliver scalable, high-quality solutions while ensuring effective communication and continuous improvement.

EDUCATION

Lebanese University (Faculty of technology)

Bachelor on Business Computer - 78

Sep 2023 - Jun 2026

PROJECTS

Municipality

Feb 2026 - Jun 2026

Developed a full-stack mobile application to digitalize and automate municipal services using **Flutter, Spring Boot, PostgreSQL, and Camunda 8**. Implemented secure authentication, workflow automation, service management, document handling, and role-based access control to improve communication between citizens and municipalities.

SKILLS

- **Programming Languages:** Java, Dart, JavaScript, C#, C, PHP, SQL.
- **Concepts Learned:** Object-Oriented Programming (OOP), Data Structures (Arrays, Linked Lists, Stacks, Queues, Trees), MVC Architecture.
- **Front-End:** HTML, CSS, Bootstrap, Flutter (Dart).
- **Back-End:** Spring Boot, Laravel, RESTful APIs, MySQL, PostgreSQL, SQL Server.
- **Workflow Automation & Business Process Management:** Camunda 8, Zeebe, BPMN Process Modeling, DMN Decision Modeling.
- **Security & Architecture:** JWT Authentication, Role-Based Access Control (RBAC), Multi-Tenant Architecture
- **Additional:** Git/GitHub, Postman, Android Studio, VS Code, Jira, Confluence, Slack, Agile/Scrum, Software Testing.
- **Operating Systems:** Windows.
